## **Nitrogen, Phosphorus and Sulphur Utilisation by Fungi: Symposium of the British Mycological Society Held at The University of Birmingham, April 1988 (British Mycological Society Symposia)**

The only up-to-date and detailed analysis of nitrogen, phosphorus and sulphur utilization by fungi is presented in this book. Based on the 1988 British Mycological Society symposium, it is broadly based, covering four basic areas: physiology and metabolism of nitrogen, phosphorus and sulphur by fungi; role of these minerals in pathogenic relationships with plants; their role in mutualistic relationships with plants; and the role of saprotrophic fungi in cycling of the elements through ecosystems. This is a useful reference for research workers, advanced students and teachers of mycology, plant pathology, plant nutrition and soil ecology.
