Statistical evaluation of diagnostic performance in general and Receiver Operating Characteristic (ROC) analysis in particular are important for assessing the performance of medical tests and statistical classifiers, as well as for evaluating predictive models or algorithms. This book presents innovative approaches in ROC analysis, which are relevant to a wide variety of applications, including medical imaging, cancer research, epidemiology, and bioinformatics.

**Statistical Evaluation of Diagnostic Performance: Topics in ROC Analysis** covers areas including monotone-transformation techniques in parametric ROC analysis, ROC methods for combined and pooled biomarkers, Bayesian hierarchical transformation models, sequential designs and inferences in the ROC setting, predictive modeling, multireader ROC analysis, and free-response ROC (FROC) methodology.

The book is suitable for graduate-level students and researchers in statistics, biostatistics, epidemiology, public health, biomedical engineering, radiology, medical imaging, biomedical informatics, and other closely related fields. Additionally, clinical researchers and practicing statisticians in academia, industry, and government could benefit from the presentation of such important and yet frequently overlooked topics.

**From reader reviews:**

**Bridget Carter:**

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each e-book has different aim or perhaps goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. They are reading whatever they consider because their hobby is reading a book. Consider the person who don't like studying a book? Sometime, individual feel need book when they found difficult problem or even exercise. Well, probably you will need this Statistical Evaluation of Diagnostic Performance: Topics in ROC Analysis (Chapman & Hall/CRC Biostatistics Series).

**Kathy Norvell:**

Book is to be different per grade. Book for children right up until adult are different content. As you may know that book is very important for all of us. The book Statistical Evaluation of Diagnostic Performance: Topics in ROC Analysis (Chapman & Hall/CRC Biostatistics Series) ended up being making you to know about other understanding and of course you can take more information. It is quite advantages for you. The publication Statistical Evaluation of Diagnostic Performance: Topics in ROC Analysis (Chapman & Hall/CRC Biostatistics Series) is not only giving you far more new information but also for being your friend when you feel bored. You can spend your spend time to read your guide. Try to make relationship together with the book Statistical Evaluation of Diagnostic Performance: Topics in ROC Analysis (Chapman & Hall/CRC Biostatistics Series). You never experience lose out for everything in the event you read some books.

**Marilyn Calhoun:**

Reading a publication tends to be new life style on this era globalization. With examining you can get a lot of information that may give you benefit in your life. Along with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. Many author can inspire their reader with their story as well as their experience. Not only the storyplot that share in the books. But also they write about the knowledge about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors on earth always try to improve their ability in writing, they also doing some investigation before they write for their book. One of them is this Statistical Evaluation of Diagnostic Performance: Topics in ROC Analysis (Chapman & Hall/CRC Biostatistics Series).

**Larry Hayes:**

Reserve is one of source of understanding. We can add our understanding from it. Not only for students but additionally native or citizen will need book to know the upgrade information of year in order to year. As we

know those books have many advantages. Beside all of us add our knowledge, also can bring us to around the world. Through the book Statistical Evaluation of Diagnostic Performance: Topics in ROC Analysis (Chapman & Hall/CRC Biostatistics Series) we can acquire more advantage. Don't someone to be creative people? To be creative person must want to read a book. Simply choose the best book that suited with your aim. Don't end up being doubt to change your life with this book Statistical Evaluation of Diagnostic Performance: Topics in ROC Analysis (Chapman & Hall/CRC Biostatistics Series). You can more pleasing than now.
