'JUST A PATSY'

On 22 November 1963, President John F. Kennedy was assassinated in Dallas, Texas. The world was led to believe that Lee Harvey Oswald carried out the assassination unaided. An official investigation into the death of President Kennedy was carried out by the Warren Commission. They concluded that there was no conspiracy, either foreign or domestic, and that President Kennedy was killed by one lone crazed assassin. However, doubts of their findings remain to this day.

This book, 'JUST A PATSY,' shows that there is enough evidence around to cast doubts on the official conclusions left behind by the Warren Commission. The book also features some stunning new evidence of a 'Second Oswald' operating in the weeks leading up to the assassination.
