Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) Nikitas-Spiros Koutsoukis, Gautam Mitra

In **Decision Modelling And Information Systems: The Information Value Chain** the authors explain the interrelationships between the decision support, decision modelling, and information systems.

The first two parts of the book focus on the interdisciplinary decision support framework, in which mathematical programming (optimization) is taken as the inference engine. The role of business analytics and its relationship with recent developments in organisational theory, decision modelling, information systems and information technology are considered in depth. Part three of the book includes a carefully chosen selection of invited contributions from internationally-known researchers. These contributions are thought-provoking and cover key decision modelling and information systems issues.

The final part of the book covers contemporary developments in the related area of business intelligence considered within an organizational context. The topics cover computing delivered across the web, management decision-making, and socio-economic challenges that lie ahead. It is now well accepted that globalisation and the impact of digital economy are profound; and the role of e-business and the delivery of decision models (business analytics) across the net lead to a challenging business environment. In this dynamic setting, decision support is one of the few interdisciplinary frameworks that can be rapidly adopted and deployed to so that businesses can survive and prosper by meeting these new challenges.

From reader reviews:

Martin Phair:

This Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) book is just not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is definitely information inside this publication incredible fresh, you will get facts which is getting deeper anyone read a lot of information you will get. This kind of Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) without we comprehend teach the one who reading it become critical in thinking and analyzing. Don't possibly be worry Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) can bring whenever you are and not make your case space or bookshelves' grow to be full because you can have it within your lovely laptop even phone. This Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) having very good arrangement in word and also layout, so you will not experience uninterested in reading.

Pierre Taylor:

The actual book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) will bring you to the new experience of reading a new book. The author style to elucidate the idea is very unique. If you try to find new book to see, this book very suitable to you. The book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) is much recommended to you to read. You can also get the e-book from the official web site, so you can more easily to read the book.

Gregory Stclair:

That reserve can make you to feel relax. This particular book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) was vibrant and of course has pictures around. As we know that book Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) has many kinds or type. Start from kids until young adults. For example Naruto or Private eye Conan you can read and think you are the character on there. Therefore not at all of book tend to be make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading that.

Kenton Marshall:

Reading a e-book make you to get more knowledge from this. You can take knowledge and information from the book. Book is prepared or printed or illustrated from each source that filled update of news. With this modern era like now, many ways to get information are available for anyone. From media social such as

newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just looking for the Decision Modelling and Information Systems: The Information Value Chain (Operations Research/Computer Science Interfaces Series) when you needed it?
