A Course in Mathematical Modeling (Mathematical Association of America Textbooks)

Douglas D. Mooney, Randall Swift

A Course in Mathematical Modeling (Mathematical Association of America Textbooks) Douglas D. Mooney, Randall Swift

The emphasis of this book lies on the teaching of mathematical modeling rather than simply presenting models. To this end the book starts with the simple discrete exponential growth model as a building block, and successively refines it. This involves adding variable growth rates, multiple variables, fitting growth rates to data, including random elements, testing exactness of fit, using computer simulations and moving to a continuous setting. No advanced knowledge is assumed of the reader, making this book suitable for elementary modeling courses. The book can also be used to supplement courses in linear algebra, differential equations, probability theory and statistics.

From reader reviews:

Gina Keller:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to learn everything in the world. Each book has different aim or perhaps goal; it means that reserve has different type. Some people truly feel enjoy to spend their time to read a book. They are really reading whatever they acquire because their hobby is definitely reading a book. How about the person who don't like looking at a book? Sometime, man feel need book once they found difficult problem or maybe exercise. Well, probably you will want this A Course in Mathematical Modeling (Mathematical Association of America Textbooks).

Christine Hughes:

Nowadays reading books are more than want or need but also be a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge even the information inside the book which improve your knowledge and information. The details you get based on what kind of e-book you read, if you want have more knowledge just go with schooling books but if you want feel happy read one along with theme for entertaining for instance comic or novel. Typically the A Course in Mathematical Modeling (Mathematical Association of America Textbooks) is kind of reserve which is giving the reader erratic experience.

Ricardo Kiernan:

This book untitled A Course in Mathematical Modeling (Mathematical Association of America Textbooks) to be one of several books that will best seller in this year, that is because when you read this e-book you can get a lot of benefit into it. You will easily to buy this book in the book store or you can order it through online. The publisher of this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Touch screen phone. So there is no reason to you to past this reserve from your list.

James Weil:

That publication can make you to feel relax. That book A Course in Mathematical Modeling (Mathematical Association of America Textbooks) was colourful and of course has pictures on there. As we know that book A Course in Mathematical Modeling (Mathematical Association of America Textbooks) has many kinds or variety. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and believe you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading in which.
