## **Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library)** Natasha Rozhkovskaya

The main part of this book describes the first semester of the existence of a successful and now highly popular program for elementary school students at the Berkeley Math Circle. The topics discussed in the book introduce the participants to the basics of many important areas of modern mathematics, including logic, symmetry, probability theory, knot theory, cryptography, fractals, and number theory. Each chapter in the first part of this book consists of two parts. It starts with generously illustrated sets of problems and hands-on activities. This part is addressed to young readers who can try to solve problems on their own or to discuss them with adults. The second part of each chapter is addressed to teachers and parents. It includes comments on the topics of the lesson, relates those topics to discussions in other chapters, and describes the actual reaction of math circle participants to the proposed activities. The supplementary problems that were discussed at workshops of Math Circle at Kansas State University are given in the second part of the book. The book is richly illustrated, which makes it attractive to its young audience. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI).

### **From reader reviews:**

#### **Eugene Obrien:**

Now a day those who Living in the era just where everything reachable by connect with the internet and the resources in it can be true or not demand people to be aware of each info they get. How people have to be smart in having any information nowadays? Of course the correct answer is reading a book. Studying a book can help men and women out of this uncertainty Information mainly this Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library) book because this book offers you rich information and knowledge. Of course the info in this book hundred per-cent guarantees there is no doubt in it you probably know this.

#### **Susan Ford:**

Playing with family inside a park, coming to see the ocean world or hanging out with friends is thing that usually you might have done when you have spare time, after that why you don't try point that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library), it is possible to enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh seriously its mind hangout guys. What? Still don't buy it, oh come on its known as reading friends.

#### **Harry Branham:**

Within this era which is the greater person or who has ability in doing something more are more treasured than other. Do you want to become certainly one of it? It is just simple approach to have that. What you need to do is just spending your time not much but quite enough to experience a look at some books. On the list of books in the top collection in your reading list is Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library). This book which can be qualified as The Hungry Hillsides can get you closer in growing to be precious person. By looking upwards and review this publication you can get many advantages.

#### **Curt Hall:**

That publication can make you to feel relax. This particular book Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library) was bright colored and of course has pictures on the website. As we know that book Math Circles for Elementary School Students: Berkeley 2009 and Manhattan 2011 (MSRI Mathematical Circles Library) has many kinds or type. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and believe you are the character on there. Therefore , not at all of book are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you and try to like reading which.
