Neoconstructivism: The New Science of Cognitive Development Scott Johnson

Arguments over the developmental origins of human knowledge are ancient, founded in the writings of Plato, Aristotle, Descartes, Hume, and Kant. They have also persisted long enough to become a core area of inquiry in cognitive and developmental science. Empirical contributions to these debates, however, appeared only in the last century, when Jean Piaget offered the first viable theory of knowledge acquisition that centered on the great themes discussed by Kant: object, space, time, and causality. The essence of Piaget's theory is constructivism: The building of concepts from simpler perceptual and cognitive precursors, in particular from experience gained through manual behaviors and observation.

The constructivist view was disputed by a generation of researchers dedicated to the idea of the "competent infant," endowed with knowledge (say, of permanent objects) that emerged prior to facile manual behaviors. Taking this possibility further, it has been proposed that many fundamental cognitive mechanisms -- reasoning, event prediction, decision-making, hypothesis testing, and deduction -- operate independently of all experience, and are, in this sense, innate. The competent-infant view has an intuitive appeal, attested to by its widespread popularity, and it enjoys a kind of parsimony: It avoids the supposed philosophical pitfall posed by having to account for novel forms of knowledge in inductive learners. But this view leaves unaddressed a vital challenge: to understand the mechanisms by which new knowledge arises.

This challenge has now been met. The neoconstructivist approach is rooted in Piaget's constructivist emphasis on developmental mechanisms, yet also reflects modern advances in our understanding of learning mechanisms, cortical development, and modeling. This book brings together, for the first time, theoretical views that embrace computational models and developmental neurobiology, and emphasize the interplay of time, experience, and cortical architecture to explain emergent knowledge, with an empirical line of research identifying a set of general-purpose sensory, perceptual, and learning mechanisms that guide knowledge acquisition across different domains and through development.

From reader reviews:

Angela Jones:

Here thing why this specific Neoconstructivism: The New Science of Cognitive Development are different and dependable to be yours. First of all reading through a book is good nevertheless it depends in the content than it which is the content is as delicious as food or not. Neoconstructivism: The New Science of Cognitive Development giving you information deeper and different ways, you can find any book out there but there is no e-book that similar with Neoconstructivism: The New Science of Cognitive Development. It gives you thrill studying journey, its open up your own personal eyes about the thing this happened in the world which is possibly can be happened around you. You can bring everywhere like in area, café, or even in your method home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Neoconstructivism: The New Science of Cognitive Development in e-book can be your alternate.

Sara Otoole:

The feeling that you get from Neoconstructivism: The New Science of Cognitive Development may be the more deep you rooting the information that hide inside the words the more you get serious about reading it. It does not mean that this book is hard to be aware of but Neoconstructivism: The New Science of Cognitive Development giving you excitement feeling of reading. The article author conveys their point in particular way that can be understood by means of anyone who read that because the author of this reserve is well-known enough. This book also makes your own vocabulary increase well. It is therefore easy to understand then can go along, both in printed or e-book style are available. We suggest you for having this Neoconstructivism: The New Science of Cognitive Development instantly.

Phillip Patten:

Hey guys, do you would like to finds a new book to study? May be the book with the headline Neoconstructivism: The New Science of Cognitive Development suitable to you? The particular book was written by well known writer in this era. The book untitled Neoconstructivism: The New Science of Cognitive Development is a single of several books this everyone read now. This kind of book was inspired many men and women in the world. When you read this e-book you will enter the new shape that you ever know previous to. The author explained their thought in the simple way, thus all of people can easily to understand the core of this e-book. This book will give you a great deal of information about this world now. To help you to see the represented of the world in this book.

Beverly Turner:

Reading a book for being new life style in this 12 months; every people loves to study a book. When you study a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you want to get information about your examine, you can read

education books, but if you want to entertain yourself you can read a fiction books, such us novel, comics, and also soon. The Neoconstructivism: The New Science of Cognitive Development provide you with new experience in looking at a book.
