The book's organization reflects the "tried and true" format of the best-selling "Fitz" Color Atlas: for each condition, there are one to two color photographs coupled with salient points of epidemiology, history, physical exam, differential diagnosis, laboratory and special examinations, disease course and up-to-date treatments.

Look for these important highlights:

- *an extensive collection of exquisite new photographs for each condition as they present in children or adolescents
- *a concise summary of etiology, physical findings, laboratory tests and prognosis for each condition
- *emergency skin signs of life-threatening conditions in children, including infectious diseases, adverse drug reactions, and more
- *new therapeutic recommendations including the recently approved exciting topical immunomodulators for atopic dermatitis (tacrolimus) and HPV infections (imiquimod) with dosages and indications for the pediatric population

PEDIATRIC COLOR ATLAS features:

- *493 new, crisp, clear color photographs from many previously unpublished collections
- *straight-forward, user-friendly organization
- *excellent, up-to-date management and therapy section approved pediatric dosages

A remarkable dollar value, this new PEDIATRIC COLOR ATLAS is an unbeatable visual guide to confirm your next diagnosis.
