## Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information

Just like the industrial society of the last century depended on natural resources, today's society depends on information and its exchange.

Staab and Stuckenschmidt structured the selected contributions into four parts: Part I, "Data Storage and Access", prepares the semantic foundation, i.e. data modelling and querying in a flexible and yet scalable manner. These foundations allow for dealing with the organization of information at the individual peers. Part II, "Querying the Network", considers the routing of queries, as well as continuous queries and personalized queries under the conditions of the permanently changing topological structure of a peer-to-peer network. Part III, "Semantic Integration", deals with the mapping of heterogeneous data representations. Finally Part IV, "Methodology and Systems", reports experiences from case studies and sample applications.

The overall result is a state-of-the-art description of the potential of Semantic Web and peer-to-peer technologies for information sharing and knowledge management when applied jointly.

### **From reader reviews:**

#### **Darlene Lewis:**

What do you think of book? It is just for students as they are still students or the idea for all people in the world, the particular best subject for that? Merely you can be answered for that query above. Every person has various personality and hobby per other. Don't to be forced someone or something that they don't would like do that. You must know how great and important the book Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information. All type of book are you able to see on many options. You can look for the internet methods or other social media.

#### **Jill Beery:**

In this 21st hundred years, people become competitive in each way. By being competitive currently, people have do something to make these survives, being in the middle of often the crowded place and notice through surrounding. One thing that at times many people have underestimated that for a while is reading. That's why, by reading a guide your ability to survive enhance then having chance to stand than other is high. For you who want to start reading a new book, we give you this Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information book as nice and daily reading book. Why, because this book is more than just a book.

#### **Mary Cox:**

As a student exactly feel bored to help reading. If their teacher questioned them to go to the library or make summary for some guide, they are complained. Just very little students that has reading's heart and soul or real their passion. They just do what the instructor want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information can make you feel more interested to read.

#### **Judith Ellis:**

Publication is one of source of information. We can add our information from it. Not only for students but in addition native or citizen have to have book to know the upgrade information of year to help year. As we know those textbooks have many advantages. Beside we add our knowledge, also can bring us to around the world. By book Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information we can take more advantage. Don't that you be creative people? Being creative person must choose to read a book. Simply choose the best book that suited with your aim. Don't become doubt to change your life by this book Semantic Web and Peer-to-Peer: Decentralized Management and Exchange of Knowledge and Information. You can more appealing than now.
